COMP 3311 assignment 2
(Converting an ERD to a database schema)
# Spring 2015

Due date: 6th March 2015 (12 noon)

Assignment Rules:

1) This is an *individual* assignment; you are required to work on your own.
2) The assignment solution you submit must be solely your own work; copying or letting others to copy are both considered cheating.

Assignment description:

By referring to the given ER diagram below, convert the ERD into the corresponding database schema (i.e. the relational schemas). Identify all the primary keys and foreign keys (underline them) of the relational schemas. Also identify all the "non-null" constraints of the schemas.

Submission:

- ❖ Please write ***clearly*** your ***name***, ***student ID*** and ***tutorial session***(e.g. "T01", "T02") on the first line of your assignment.

- ❖ You are required to submit a hardcopy to the assignment box labelled with "Comp3311(L1)" or "Comp3311(L2)" outside the room 4210, corresponding to the lecture session you attend.

- ❖ If you cannot find the assignment box. Please contact the TAs ***BEFORE*** the due date.

- ❖ No Late submission will be accepted!
